## SKILLS

Languages	Experience in	Tools	Methodologies
Java	SQL	NodeJS	GitHub
JavaScript	API	Firestore	Agile
C	JQuery		SDLC
HTML & CSS	JSON		

## PROJECTS HACKATHONS

### DisConvo – nwHacks Jan 2021

Developed a web application where a user matches with a stranger to discuss and debate different topics. Following my teammate's prototype design created on Figma, I executed the front end.

*Used: HTML, CSS, JavaScript, GitHub*

### TutorFinder – BCIT, Term 1 Sept – Dec 2020

We developed a web application that allows tutors and students to connect online during the pandemic. I worked on both the front end and back end.

*Used: HTML, CSS, JavaScript, GitHub, Firebase*

### ColorFriendly – SAP iXp Hack4Good Oct 2020

We created an application that allows a user to input an image URL to determine whether that image is visually accessible. I primarily worked on the UI and UX design of our web application and some front end too.

*Used: HTML, CSS, GitHub*

## WORK

### JOEY Restaurant Mar 2018 – Dec 2020

*Server:*

- Communicated effectively with staff and customers.
- Trained new staff.

### Caffè Artigiano July 2016 – Aug 2018

*Manager:*

- Managed all café operations including ordering, scheduling, hiring and training and increased sales by 20% by the end of my tenure.
- Won 'best latte art' at the annual award ceremony.

### ABA Centre International July 2020 – August 2020

*Tutor:*

- Helped children with Autism Spectrum Disorder learn the basics of HTML & CSS and create simple web pages.

## VOLUNTEER

## EDUCATION

### British Columbia Institute of Technology 2020 – Present

Computer Systems Technology Program

GPA: 89%
